Hydrogen Generator for GC

Part Number : See Reverse

Service Kit : 08-3609

Your local **gas generation** partner

Description

The Precision Hydrogen generators are designed to provide the gas needed for detectors requiring Hydrogen fuel gas, such as FID and FPD. One generator is capable of supplying multiple detectors, and are available in various flow rates to ideally suit individual customers' needs.

These generators utilise a Proton Exchange Membrane to create the Hydrogen gas from deionized water, and a desiccant filtration stage is used to dry the gas.

Precision Hydrogen gas generators come with various safety features as standard, giving you complete peace of mind in the laboratory and a far safer, dependable and more convenient alternative to cylinder gas.

Applications

- ▶ **Detector Gas**
- Fuel Gas
